Development of Investment Portfolios

If P&C, Mandatum Life and Sampo plc, 31 December 2013 and 31 December 2012

Sampo plc has a liquidity portfolio consisting mainly of money market instruments and a long-term portfolio including subordinated debt instruments issued by the insurance subsidiaries and the associated companies. The investments of Mandatum Life's Baltic subsidiary are included in Mandatum Life's investment assets as equity in all tables and graphs in this Risk Management section.

The insurance liabilities as well as the risk appetite of Mandatum Life and If P&C differ and as a result, the structures and risks of investment portfolios of the two companies often are different. This is reflected also in the companies' investment returns. Mandatum

Life has had on average higher returns and higher volatility. The figure Annual Investment Returns at Fair Values, If P&C and Mandatum Life, 2004–2013 presents the historical development of investment returns.

Parent company Sampo plc's asset portfolio is a liquidity reserve including mainly short-term money market instruments and hence its market risks are limited. Interest rate risk arising from gross debt and the liquidity reserve is Sampo plc's most significant

market risk together with refinancing risk related to gross debt. Most of the parent company's debt is tied to short-term reference rates as a consequence of interest rate swaps used. This mitigates group level interest rate risk because, while lower interest rates

would reduce subsidiaries' investment returns in the long-term, the interest expense in the parent company would also be lower.

Fixed income investments and listed equity instruments form major part of the subsidiaries' investment portfolios. Money market securities, cash and investment grade government bonds form a liquidity buffer within fixed income investments. The average maturity of fixed income investments was 2.2 years in If P&C and 2.2 years in Mandatum Life. In both companies the average maturity is longer than duration ([Interest Rate and Currency Risks](#) section) because the fixed income investments include floating rate notes.

Both If P&C and Mandatum Life are exposed mainly to interest rate and currency risks (general market risks) as well as to equity and spread risks.

Additionally, If P&C and Mandatum Life have real estate investments, unlisted equity instruments (mainly private equity funds) and alternative investments. The Investment Policies set limits for maximum allocations into these asset classes and products. On 31 December 2013, the combined share of the above mentioned investments was 5.0 per cent of the total investment portfolio of Sampo Group. In If P&C the proportion was 1.0 per cent and in Mandatum Life it was 13.9 per cent. These asset classes are managed in most cases by external asset managers with the exception of the Group's real estate portfolio that is managed by Sampo Group's real estate management unit. The real estate portfolio includes both direct investments in properties and indirect investments in real estate funds as well as in shares and debt instruments in real estate companies.
